WHAT IS A 3-IN-1 WELDING MACHINE?

A3-IN-1WeldingMachinecombines threedifferent weldingfunctions inone compact, versatile unit. These functions allow you to perform a variety of processes for different materials, welding positions, and applications.

This 3-IN-1 Welding Machine offers the flexibility of MIG welding for ease and speed, TIG welding for precision and quality, and MMA welding for manual applications. It is suitable for a range of welding tasks in different environments, providing versatility and efficiency in one unit.

MIG SYNERGIC

Automatic adjustment of parameters for faster and easier welding. Fe, Fe Flux Cored, SS, Al, CuSi programs.

LIFT TIG DC

For precision welding of steel, stainless steel, and other ferrous materials using direct current with gas solenoid.

MMA

Manual, versatile stick welding suitable for tough outdoor environments and various materials.
